AUTHOR Thornberry, Patricia Lee; Michael, James D.
TITLE Micrographics: A Bibliography of Sources.
PUB DATE May 82
NOTE 51p.; Prepared for a Seminar on Microforms Management at the Florida Library Association Annual Conference (May 5 and 8, 1982).
PUB TYPE Reference Materials - Bibliographies (131) -- Speeches/Conference Papers (150)

EDRS PRICE MF01/PC03 Plus Postage.
DESCRIPTORS *Cataloging; *Computer Output Microfilm; Evaluation Criteria; *Information Retrieval; *Information Storage; Library Collections; Library Standards; Media Selection; Microform Readers; *Microforms; Preservation; Reprography; Trend Analysis; *Use Studies

ABSTRACT

This extensive micrographics bibliography, which includes citations drawn from a literature search and prepared bibliographies, covers microforms, microfiche, and microfilm. Sections include 3 pages of book citations, 6 pages citing ERIC documents, and 33 pages of journal citations. Topics covered include microform library usage and usage in other fields including law and medicine; librarianship; and library concerns such as indexing, cataloging, costs, advantages and disadvantages, management, information storage and retrieval, standards, preservation, selection, and equipment selection. Data processing, reprography, microreproduction equipment, readers, and reader printers are included, as are references covering planning, new developments, environments, user attitudes, trends, and future impact. Citations are not annotated. Though the author states that an attempt was made to examine all materials, citations may be given as they appeared in sources and may include variations in name forms or other details. (LMM)

## INTRODUCTION

Citations included in the bibliography have been drawn together by searching the literature as well as from prepared bibliographies. Though an attempt was made to examine all the materials included, this was not possible. Thus, citations may be given as they appeared in the sources, and variations may exist in name forms, etc.
